

ENTERPRISE MOBILITY FOR HEALTHCARE

Advancing the patient experience with Android Enterprise solutions.

- > Custom, enterprise-grade mobile devices for hospitals and healthcare providers
- > Improve the end-to-end patient experience, whether remote or in-person
- > Streamline the device lifecycle from manufacturing to deployment and management

Mobile devices, such as smartphones and tablets, have greatly impacted the healthcare industry by providing new platforms for telehealth, remote patient monitoring, and clinical trials. Wearables, such as smartwatches and fitness trackers, are becoming increasingly popular in the healthcare industry due to their ability to track and monitor various health metrics.

A custom mobility solution ensures that these devices are purpose-built, secure, and guaranteed available for up to five years.

CUSTOM DEVICES

We design, engineer, and manufacture custom devices in a wide variety of form factors from smartphones, tablets, wearables, kiosks, and more. Built with Android Enterprise and Google Play Protect certified.

RHINO MOBILITY

Choose from our portfolio of enterprise-grade devices, including smartphones, tablets, barcode scanners, and more. All built with Android Enterprise, Play Protect certified, and ready to ship today.

MANAGED SERVICES

Let us handle device logistics so you can focus on what's more important - your business. Our global network of warehouse teams can handle the entire device lifecycle from staging and kitting to repair and recycle.

WIRELESS CONNECTIVITY

Keep your teams connected by tapping into cutting-edge 5G and LTE networks. Our team can add global connectivity to your devices and design a wireless plan that works for your entire fleet no matter the size or number of devices.
