

CASE STUDY

Revolutionizing Bedside Care with the First Google-Certified Patient Engagement Solution

OVERVIEW

Oneview Healthcare, with **NEXA**, developed **first-ever** 22" Google-certified, All-In-One patient engagement solution to enhance bedside care and streamline clinical workflows.

KEY HIGHLIGHTS

50% Lower deployment costs, delivering to care facilities around the globe.

2k Device rollouts in patient rooms globally.

50+ Integrations with strategic partners.

PARTNERS

Android  

NEXA

NEXA is the leading provider of enterprise mobility solutions. We are an IoT design firm that specializes in developing custom devices for the world's biggest companies. As one of Google's validated Android Enterprise Gold partners, we handle every aspect of our clients' mobility needs.

CHALLENGE

Amid growing nursing shortages and reliance on outdated equipment, Oneview needed to modernize the in-room patient experience by replacing legacy Windows-based bedside terminals that were expensive to maintain, hard to scale, and disconnected from today's digital healthcare ecosystem. These older systems introduced security vulnerabilities, increased refresh costs, and created fragmented experiences for both patients and care team.

SOLUTION

To drive innovation, Oneview partnered with **NEXA** to develop a 22" modular monitor integrated with their MyStay Mobile SaaS platform, delivering enhanced security and a more engaging patient experience at the bedside.

Cost-Effective Hardware:

Replaces aging Windows bedside terminals with a lightweight, Android-based alternative, offering 5-year availability and seamless over-the-air (OTA) updates, reducing IT overhead.

Enhanced Security:

Integrated biometric and RFID authentication ensures secure clinician access, Android Enterprise-grade security, and remote management, meeting strict healthcare compliance standards.

Improved Patient & Clinical Experience:

Patients can access telehealth, meal ordering, health records, and entertainment, while clinicians benefit from thousands of daily interactions, improving workflow efficiency.

CONCLUSION

Oneview Healthcare and **NEXA** have redefined patient care and clinical workflows. The 22" modular monitor with MyStay Mobile, delivering a seamless, connected care experience in line with Oneview's mission to 'improve connected care experiences, everyday.'
